PREAMBLE

Special tests used in medicine and related fields are the methods used in the pre-diagnosis of mutilation and injuries, providing convenience in both diagnosis and treatment.

Not being enough resources about these tests, not being easy for everyone to access foreign sources, and also the problems of our students not to have enough sources about these issues are the most important factors in the preparation of this book.

I present my sincere thanks to my dear teachers and students who supported me in the preparation of the book.

In addition, I express my gratitude to our valuable teachers and the constituents of Başkent University. Prof. Dr. Mehmet Haberal and Başkent University Rector. Prof. Dr. Ali Haberal, who have created all the possibilities of the Haberal Education Foundation and made it possible to create and print this book.

Associate Professor Dr. Mustafa Gülşen

CONTENTS

SHOULDER REGION

1. Subacromial Impingement Syndrome Tests

a. Neer test	1
b. Hawkin's Test	2
c. Painful Arc Test	3
d. Injection Test	4
e. Yocum Test	5

2. Supraspinatus Tests

a. Jobe Test (Empty Can Test)	6
b. Full Can Test	7
c. Drop Arm Test	8
d. 0 Degree Abduction Test	9

3. Infraspinatus Tests

a. Patte Test	10
b. External Rotation Failure Symptom (Lag Sign)	11
c. External Rotation Resistance Test	12

4. Subscapularis Tests

a. Gerber Lift-off Test	13
b. Internal Rotation Failure Symptom (Lag Sign)	14
c. Abdominal Compression Test (Belly-Press Test)	15

5. Tests Used in Biceps Tendon Pathologies

a. Speed Test	16
b. Yergason's test	17

6. Tests For Acromioclavicular Joint Pathologies

a. Horizontal Adduction Test	18
b. Anterior Apprehension Test	19
c. Posterior Apprehension Test	20
d. Active Compression Test (O'Brien sign)	21
e. Cross Arm Adduction Stress Test	22
f. Resisted Extension Test	23
g. Paxinos Sign	24

7. Shoulder Instability Tests

a. Sulcus Sign	25
b. Load and Shift test	26
c. Apprehension test	27
d. Relocation test	28
e. to. Posterior Instability Test	29

ELBOW

1. Cozen test (Tennis elbow test)	30
2. Golfer's Elbow Test	31
3. Tinel Test	32
4. Resistant Ankle Extension Test (THOMSEN)	33
5. Resistive Middle Finger Extension Test (MAUDLEY)	34

HAND- WRIST

1. Tinel Sign	35
2. Phalen (Wrist Flexion) Test	36
3. Reverse Phalen Test	37
4. Carpal Compression Test	38
5. Ischemic (Tourniquet) Test	38
6. Wrist Flexion And Carpal Compression Test	40
7. Carpal Compression Test (Durkan's)	41
8. Tourniquet- Gilliat Test	42
9. Stretched Median Nerve Stress Test	43
10. Lumbrical Provocation Test	44
11. Hand Elevation Test	45

HIP

1. Stahelli Test	47
2. Trendelenburg Test	48
3. Thomas Test	49
4. Patrick Or Fabere Test	50
5. Ober Test	51
6. Straight Leg Raise Test (Laseque)	52
7. Bicycle Test	53
8. Apprehension Test	54
9. Impingement Test	55

KNEE

1. Lachman Test	56
2. Anterior Drawer Test	57
3. Flexion- Rotation Drawer Test	58
4. Pivot Shift Test	59
5. Mac Intosh Test	60
6. Jerk Test	61
7. Loosee Test	62
8. McMurray Test	63
9. Apley Test	64

FOOT - ANKLE

1. Tinel Sign	66
2. Stability Tests	67
3. Front Drawer Test	67
4. Inversion Stress Test	68
5. Homan's Sign Test	69

SERVICAL ZONE

1. Spurling Test	70
2. Compression Test	72
3. Distraction Test	73
4. Brachial Plexus Tension Test	74

5. Shoulder Depression Test	75
6. Shoulder Abduction (Relaxation) Test	76
7. Valsalva Test	77
8. Naffziger Test	78
9. Lhermitte's Sign	79
10. Swallowing Test	80
11. Adson Test	81

THORACIC REGION

1. Passive Scapular Approximation Test	82
2. First Thoracic Nerve Tension Test	83
3. Beevor Sign	84

LUMBAL REGION

1. Straight Leg Raise Test	85
2. Laseque Test	86
3. Bilateral Straight Leg Raise Test	87
4. Bragard's Test	88
5. Femoral Nerve Tension Test	89
6. Fajersztajn Finding	90

TESTS LESS APPLIED IN CLINICAL PRACTICE

1. Internal Rotation Test	91
2. Bechterew's Test	92
3. Lindner Test	93
4. Minor Test	94
5. Neri's Bowing Test	95
6. Cox Test	96
7. Milgram Test	97
8. Kernig Test	98
9. Jugular Compression (Naffziger Test)	99
